

Types of Clouds

Cumulus

Nimbus

Stratus

Cirrus

Cut and glue the cloud definitions under the right heading. Then use cotton or draw each type of cloud.

These clouds are high, thin, and wispy like horse tails. They usually predict pleasant weather.

These clouds are lower to the ground and are a little gray. They cover the sky like a blanket.

These clouds are big, white, and puffy. They look like cotton balls in the sky and have flat bottoms.

These clouds are darker than the other clouds and often produce precipitation. They are spread across the sky.
