

Count Coins and Bills

Estimating Totals

For the real situation

1. Read the problem and draw or sketch the situation. (You may use paper, pencil, and a ruler.)
2. Write down all money that is being used (coins and bills).
3. Complete a money chart.
4. Add and write the total amount.

Examples

1. A school bought 400 copies of a book for \$1.00 each. How much did the school pay?
2. A school bought 400 copies of a book for \$1.00 each. How much did the school pay?
3. A school bought 400 copies of a book for \$1.00 each.

Reading the Labels

1. Check the labels, then the different coins and bills. Write down the amount of each coin and bill. (You may use paper, pencil, and a ruler.) Write the money below.
2. Write the amount of each coin and bill. Write down the amount of each coin and bill. (You may use paper, pencil, and a ruler.) Write the money below.

How Many Ways Can \$1.00 Be Made?

quarters	dimes	nickels	quarters	nickels	total
10	0	0	1	0	1.00
8	2	0	0	0	1.00
