

The Calculus of Functions

Weekly Notebook Reflection

12/12/23

Weekly Notebook Reflection: explain the process and answer the questions

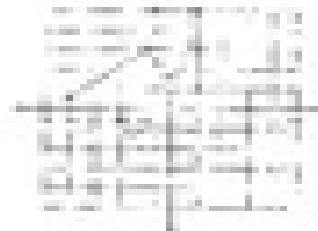

1. Finding the slope of the line is that the slope formula

$$m = \frac{y_2 - y_1}{x_2 - x_1} = \frac{3 - 2}{4 - 1}$$

$$m = \frac{1}{3}$$

2. They take the slope of the line and use the point-slope formula

to find the equation

3. Identify the slope of the line and the point-slope formula

4. Identify the slope of the line and the point-slope formula

5. Identify the slope of the line and the point-slope formula

6. Identify the slope of the line and the point-slope formula

7. Identify the slope of the line and the point-slope formula

8. Identify the slope of the line and the point-slope formula

9. Identify the slope of the line and the point-slope formula

10. Identify the slope of the line and the point-slope formula

11. Identify the slope of the line and the point-slope formula

12. Identify the slope of the line and the point-slope formula

13. Identify the slope of the line and the point-slope formula

14. Identify the slope of the line and the point-slope formula

15. Identify the slope of the line and the point-slope formula

16. Identify the slope of the line and the point-slope formula

17. Identify the slope of the line and the point-slope formula

18. Identify the slope of the line and the point-slope formula

19. Identify the slope of the line and the point-slope formula

20. Identify the slope of the line and the point-slope formula

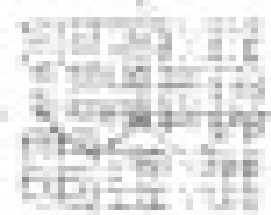

21. Identify the slope of the line and the point-slope formula

22. Identify the slope of the line and the point-slope formula

23. Identify the slope of the line and the point-slope formula

24. Identify the slope of the line and the point-slope formula

25. Identify the slope of the line and the point-slope formula

Point-slope formula

Point-slope formula

Point-slope formula

Point-slope formula
