PROBLEM SOLVING WITH ADDITION, SUBTRACTION, AND MULTIPLICATION

## FIRST COME, FIRST SERVED

Use the sales ad to solve each problem.  
Show your work on another piece of paper.

- Kevin buys 4 containers of tennis balls. How many tennis balls does he have? How much did he spend?
- Coach Mike wants a new visor for each of his 8 players. How much will he spend?
- Kevin knows that a Wilson racket regularly costs \$109.75. If he buys the racket on sale, how much money will he save?
- A pair of new-court shoes costs \$87.99 at Tom's Tennis Barn. How much less does a pair cost at The Tennis Stop?
- Carly buys 3 spools of string for her tennis rackets. How much does she spend altogether?
- Chris has \$90. He buys a Wilson racket, a racket cover, and 2 containers of tennis balls. How much money will he have left?
- Carly has her tennis racket restring. She also has a new grip put on her racket. How much does Carly spend on her racket?
- A pair of Volley sunglasses regularly costs \$50. This week, the sunglasses are on sale. How much money would Chris save if he bought a pair this week?
- Coach Mike buys 4 ball hoppers. How much does he spend?
- Kevin buys a ball hopper and 4 containers of tennis balls. He uses a \$50 bill to pay for the items. How much change does Kevin get?

### Shop at The Tennis Stop!
