

Multiplying Radical Expressions - Design your own Bingo card by randomly placing the answers in the spaces provided. (Use a pen for this part of the activity.) As the problems are read out, you will mark your work in the right of the BINGO card. When you find your answer, put the problem number inside the same square. (This is how you will "cover" the square.) When you think you have BINGO, I will check your card to see if the problem and answer are in the same square.
