

# Plants are alive, too!

## Observations

When we think of living things, we often think of animals. After all, animals move by themselves, grow, feed, react, and reproduce. Although plants do not move from place to place by themselves, they do grow and reproduce. Plants are living things, too.

## Science activity

Draw a line joining each whole plant to the part of it that will grow into a new plant.

## Science explanation

Now if you can find one whole plant or several plant parts, what happens to the leaves or magnolia? What type of life activities is this?
