

Debt Worksheet

Use this worksheet to list all debt(s) you have and be sure to include the amounts for each column. This will assist you in determining the best order in which you should begin to pay off debt. The difference (column F) is the amount that is "available" to apply to the first debt chosen to pay off. Many factors determine which debt should be paid off first. Normally you'll begin with the highest interest rate and lowest balance. Contact Total Money School at www.TotalMoneySchool.com for additional guidance.

Debt (A)	Balance (B)	Interest Rate (C)	Average Monthly Payment Made (D)	Min. Payment (E)	Difference (F)
