▶ A feeling of balance results when the elements of design are arranged to create an impression of equality in weight or importance.

▶ The arrangement of elements to give the viewer a feeling that all parts of the piece form a whole.

▶ Using different elements in an image to create visual effect.

▶ The use of reoccurring elements to direct the eye through the image.

▶ All parts of the image work together to be seen as a whole.

▶ A regular arrangement of repeated elements (Shapes colour)

▶ Relationship between objects in relation to size and numbers.

▶ Special attention given to a part of the image designed.

▶ Comparing and contrasting different elements to create visual interest and focal point.
