

Section 5-2 Review and Reinforce

(p. 133)

1. Coarse-grained
2. Porphyritic
3. Glassy
4. Fine-grained
5. Lava that is low in silica usually forms dark-colored rocks; magma that is high in silica usually forms light-colored rocks.
6. Igneous rocks are hard, dense, and durable.
7. Answers may vary. A typical answer might mention granite as a building material, basalt as a construction gravel, and pumice as an abrasive in polishes.
8. extrusive
9. porphyritic
10. intrusive
