

Calculating the percentage of a value.

All percentages can be written as a fraction over 100. (eg 25% is the same as $\frac{25}{100}$)

So to calculate the percentage of a value:

25% of 343

Multiply $25 \times 343 = 8575$

Then divide by 100
 $8575 / 100 = 85.75$

25% of 343
= 85.75

10 % of 350 = _____

15 % of 578 = _____

25 % of 1000 = _____

35 % of 700 = _____

12% of 890 = _____

75 % of 300 = _____

50 % of 500 = _____

22 % of 680 = _____

45 % of 98 = _____

33 % of 600 = _____

90 % of 550 = _____

15 % of 660 = _____

25 % of 800 = _____

50 % of 770 = _____

100 % of 770 = _____

36 % of 745 = _____

Score _____
