

Preparing a Personal Balance Sheet

Taking control of your financial future is a process. And, as with any process, it is important to monitor your progress. One of the best ways for an individual to measure financial progress is to periodically prepare a personal balance sheet. The personal balance sheet worksheet shown below helps segregate investment assets and can be used as a basis for your periodic progress measurements. It is broken into three parts to help you better understand your investments, your total financial picture and your annual progress.

Part One

Personal Balance Sheet – Investment Assets

Date Prepared _____

Category	In Taxable Investment Accounts			In Tax Free Investments or Retirement Plan Accounts			Total
	Cash	Fixed Income	Equity	Cash	Fixed Income	Equity	
Banks or Credit Unions
