Subject Area: Science

Grade Level: Lower Elementary (grade 2)

Show Me Standard: SC 1
GOAL 1.2, GOAL 1.6

Time Allowance: This unit is divided into 30-40 minute lessons

Description:

This unit is designed to encourage students to investigate the properties of energy: heat, light, and sound. Through fun activities, class discussions, and demonstrations the students will understand and explain the importance of energy.

Objectives:

- The student will discover ways energy changes from one form to another.
- The student will create sound from vibrations in matter and examine ways to change loudness and pitch and how sound travels at different rates through materials.
