

Chapter 20: A/P

What would be the following consequences?

- obesity
- no sex
- apoptosis
- no fat
- triglycerides
- liver
- osteoporosis
- osteoarthritis
- liver
- triglycerides
- cholesterol
- apoptosis
- no sex

What is the key?

1. What does obesity tell you about your sex?
2. What do these phenotypes tell you about sex? Why?
3. What about your sex at the moment?
4. What happens to your sex?
5. What is the effect of obesity on sex?

What is the key?

1. What does the sex of the individual tell you about the sex of the individual?
2. How does the sex of the individual affect the sex of the individual? (What are the key questions?)
 - a) How does the sex of the individual affect the sex of the individual?
 - b) What are the key questions?
