The Second Term Exam of English

Text:

Sometimes, we're getting more and more polluted because of the smoke industries and motor cars. In some big cities, you can hardly breathe clean or fresh air in cities. People are getting shorter and shorter. They throw rubbish wherever they can. They don't recycle tin or bags. We can also talk about the boats which transport oil and risk to sea and ocean. They cause great damage in the submarine world.

Environmental pollution has not a minor role when it comes to damage the ozone. If ozone disappears, great changes in the climate will be caused because the ozone is chemically very active as they provide us with oxygen. We let us anticipate the future as it will be an environmental disaster for humanity and especially for the ozone layer which is so important for the world. If this layer is destroyed, people will be threatened to be affected by any kind of skin disease.

Questions:

Section 1: Reading (compulsory) (10pts)

1) Why do you think the statements below are true (don't say just "because"):

- a. People are too and begin to throw rubbish.
- b. The ozone layer protects people from skin cancer.
- c. Greenhouse oxygen.
- d. Ozone is responsible for the climate change.

2) Answer the following questions according to the text:

- a- Why is air getting polluted?
- b- Why is sub-ocean world damaged?
- c- What will happen if the ozone layer is destroyed?

3) Match each word with its synonym:

words	synonyms
a. polluted	1. improved
b. recyclable	2. give
c. destroyed	3. damaged
d. threatened	4. water, under the

4) Match each word with its opposite:

words	opposites
1. poor	1. positive
2. clean	2. hot
3. better	3. death
4. life	4. dry
