

## THEORY OF THE MIND

### QUESTION 1

1. The first two diagrams show a circle with a central dot and a surrounding ring. The second diagram has a smaller circle inside the ring.

2. The third diagram shows a central square with four lines extending outwards to four smaller squares, each containing a different symbol.

3. The fourth diagram shows a central square with four lines extending outwards to four smaller squares, each containing a different symbol.

4. The fifth diagram shows a central square with four lines extending outwards to four smaller squares, each containing a different symbol.

5. The sixth diagram shows a central square with four lines extending outwards to four smaller squares, each containing a different symbol.
