

Perceptual Learning-Style Preference Questionnaire

Directions:

People learned many different ways. For example, some people are primarily with their eyes (visual learners) or with their ears (auditory learners); some people prefer to learn by experience and/or by "hands-on" tasks (kinesthetic or tactile learners); some people learn better when they work alone while others prefer to learning groups.

This questionnaire has been designed to help you identify the way(s) you learn best the way(s) you prefer to learn. Read each statement on the following pages and respond to the statements as they apply to your learning at school. Decide whether you agree or disagree with each statement. For example, if you strongly agree, mark:

SA	A	U	D	SD
Strongly Agree	Agree	Undecided	Disagree	Strongly Disagree
X				

Respond to each statement quickly, without too much thought. Try not to change your responses after you choose them. Please answer all the questions.

	5	4	3	2	1
Item	SA	A	U	D	SD
1. When the teacher tells me the instructions I understand better.					
2. I prefer to learn by moving around and doing something in class.					
3. I get more work done when I work with others.					
4. I learn more when I study with a group.					
5. In class, I learn best when I work with others.					
6. I learn better by reading what teacher writes on the whiteboard.					
7. When someone tells me how to do something in class, I learn better.					
8. When I make things in class, I learn better.					
9. I remember things I have heard in class better than things I have read.					
10. When I read instructions, I remember them better.					
11. I learn more when I can make a model of something.					
12. I understand better when I read instructions myself.					
13. When I study alone, I remember things better.					
14. I learn more when I make something for class project.
