

# Veterans Day/Remembrance Day

November 11

Veterans Day in the United States and Remembrance Day in Canada and elsewhere have originally called Remembrance Day. Although they are the day to mark the anniversary of World War I, they are the United States' own special holiday. World War I is a part of November 11, 1918. This was the second day of the armistice day of World War I. In the year many people thought that would have been the end.

After World War II, Congress and I passed changed the name of Veterans Day to Remembrance Day. The United States changed the name to Remembrance Day. After that, the name Veterans Day was used. There is still a lot of confusion. Veterans Day is not the same as Remembrance Day. Veterans Day is not the same as Remembrance Day. Veterans Day is not the same as Remembrance Day.

On Veterans Day, there are people who are proud. People who are proud and proud people like.

## Making It Work

Remember the meaning of the word "veteran" and the value of the service that veterans have provided. Remember that there are a lot of veterans who are still in the service.

What benefits does the United States provide for veterans? It provides them with a number of benefits, from health care to education. It also provides them with a number of other benefits.

Consider a community where you live or work. How does it support veterans? How does it support the families of veterans? How does it support the veterans who are still in the service? How does it support the veterans who are still in the service?

Think about the U.S. Army of fighting in World War I. How did the U.S. Army of fighting in World War I? How did the U.S. Army of fighting in World War I? How did the U.S. Army of fighting in World War I? How did the U.S. Army of fighting in World War I?

The veterans who were in service during World War I were a part of a great generation. They were a part of a great generation. They were a part of a great generation. They were a part of a great generation.
