### Fact Families

Fill in the missing number.

A.  $5 + \quad = 13$       B.  $7 + 9 = \quad$       C.  $\quad + 10 = 10$

The image shows several triangles on a light gray background, each containing numbers for fact families. The triangles are arranged as follows:

- Top left: A small right-angled triangle with the number 7 at the top vertex.
- Top right: A small right-angled triangle with the number 4 at the top vertex.
- Middle left: A large triangle with the number 48 in the center. The left side has the number 4, the right side has the number 12, and the bottom side has the number 4.
- Middle center: A large triangle with the number 24 in the center. The left side has the number 3, the right side has the number 8, and the bottom side has the number 4.
- Middle right: A large triangle with the number 11 in the center. The left side has the number 4, the right side has the number 4, and the bottom side has the number 11.

Below these triangles is a dark gray rectangular area.
