Week 8	April 14-17	Measurement	
Week 9	April 21-24	Review of all objectives	
Week 10	Tuesday, April 29	Math TAKS Exam	☺

Dear Parents,

The 2008 3rd Grade Math TAKS Test will be administered on Tuesday, April 29th. A weekly math skill enrichment packet will be sent home every Monday to review skills and objectives taught this year. Your child will need to work this packet individually proving all their answers to the math problems using strategies taught this year in class. **We are asking you to check over your child's work making sure their answers are correct, that they used their strategies, and sign that the assignment has been completed. The math folder must to be returned to school every Thursday so we can review the assignment in class. A quiz over that week's skills and objectives will be given every Friday. Students who complete eight out of the nine assignments turned in on time, showing all their strategies, and signed by a parent/guardian will get to celebrate their success and hard work with us at a 3rd level celebration.** Every effort is being done to increase math success at school for your child, and we appreciate your support at home.

Thank you,
