

**Always-Sometimes-Never  
Worksheet on Quadrilaterals**

Directions: Carefully read the following statements about polygons. In the box next to each statement, write an **A** if the statement is **always** true, **S** if it is **sometimes** true, and **N** if it is **never** true. Make sure you explain your reasoning for each statement.

1. A trapezoid is a rectangle.

Reason: \_\_\_\_\_

2. A quadrilateral is a regular polygon.

Reason: \_\_\_\_\_

3. Parallelograms are quadrilaterals.

Reason: \_\_\_\_\_

4. A trapezoid has parallel sides.

Reason: \_\_\_\_\_

5. A rectangle is a square.

Reason: \_\_\_\_\_

6. A square is a rectangle.

Reason: \_\_\_\_\_

7. A rhombus is a rectangle.

Reason: \_\_\_\_\_
