Biolo	ogy Worksheet Unit 3	Student:
	Chapters 16-17: Darwi	n and Microevolution
1.	. Because of natural selection traits which confer a	
	a. Hunting less common	
	b. Hunting more common	
	c. Reproductive less common	
	d. Reproductive more common	
	e. Digestive more common	
2.	. One word for common descent with modificatior	n is
3.	. True/False Charles Darwin was the first to take no	ote descent with modification.
4.	. True/False Homologous structures have the same	e function.
5.	 True/False Experimental demonstrations of evolunature. 	ition have been carried out in the laboratory and in
6.	 True/False The hypothesis that natural selection was accepted at the same time that descent with 	is the most important process underlying evolution modification was accepted.
7.	. True/False A population may have many alleles for	or any given gene.
8.	. Charles Darwin was the first to see that is the	primary process that drives evolution.
