### Exponent Tic-Tac-Toe

**Directions**

1. Player 1 chooses a box and calculates the correct answer. (Player 2 must also solve the problem and agree with Player 1's answer.)
2. If the answer is correct, Player 1 places an X or O in that box.
3. Repeat the directions for Player 2.
4. The first player to fill in five boxes in a row wins the game.  
(The boxes may be filled in vertically, horizontally, or diagonally.)
