	<p>Ocean Floor Project is turned in on time.</p>	/5
Project Score:		/100

Additional Comments:

A Checkbric is a grading tool that is a mixture of a checklist and a rubric. Checkbrics are to be explained and given to students at the beginning of a project. Students keep the checkbrics to check off completed parts of the assignment. When all parts are checked, students submit the checkbric and project to the teacher for grading.
