

UNDERSTAND THE ORBITS, THE MOON & THE SOLAR SYSTEM

Diagram illustrating the orbits of the planets around the Sun in the Solar System.

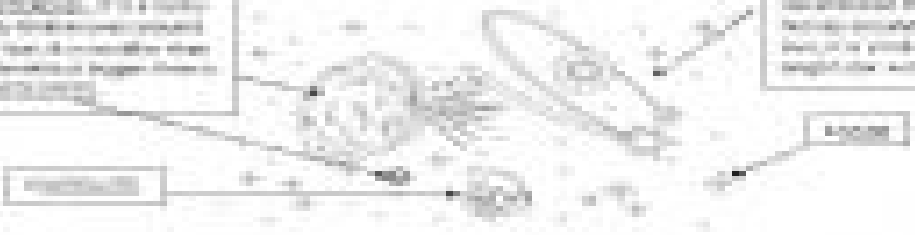

1. Name the planets from the nearest to the furthest from the Sun.

1 st _____	2 nd _____
3 rd _____	4 th _____
5 th _____	6 th _____
7 th _____	8 th _____

2. _____ is the only planet followed by a group of objects in a series of concentric orbits, like Pluto etc.

3. Describe it in a way that illustrates how the gas is made from exploded hydrogen atoms.

4. Explain in your own words how the Sun is made from gas and dust.

5. Label the planets in the diagram with the correct names.
