

A Mysterious Death!

That afternoon Melanie came home from school with her two best friends, David and Christine. The cook prepared delicious meals for Melanie's friends. They ate lunch together, and studied for their Maths exam a little. Then they played some games and chatted for a while. After her friends went home, Melanie decided to surf on the Internet. She signed in her facebook and read the comments on her photos. A few minutes later, her cousin Tom called to invite her dinner. Melanie went to her cousin's house and came back home at 10 pm. At 10.30 pm, the maid found Melanie dead in her room. Her family was devastated by this mysterious death. They decided to hire a detective to solve the case. The detective minimized the number of suspects to five. According to the detective, these five suspects were the maid, the cook, her friends David and Christine, and her cousin Tom.
