 Doctorology
 Dr. G
 Body of Evidence

The listed movies may be shown in part, modified, or as a complete movie. Most of the movies or episodes have been recommended by the HSTE Program. Some of the scenes are graphic, showing surgical procedures, medical injuries, and patients in various stages of medial treatment. For most viewings, worksheets will accompany the video to help the student highlight medical terminology, procedures, or character traits of healthcare professionals. **If there are movies on the list that you would prefer your child not to see, please contact me and I will modify the assignment for that day to accommodate your child.** Thank you.
