Geometry (H)
Worksheet: Chapter 2

1. There are three undefined terms we use in plane, or Euclidean, geometry. State them.

2. How did Euclid describe a point?

3. When we use the word *distinct* in geometry, what do we mean?

4. When we say that a point is *between* two points what, specifically, do we mean?

Define each of the terms below.

5. space

6. collinear points

7. coplanar points

8. intersection (of two figures)

9. opposite rays

10. congruent segments

11. congruent angles

12. midpoint (of a segment)

13. bisector (of a segment)
