

## Computer Basics

(Page 2 of 2)

From reading the information on the previous page, answer the following questions.

1. Name the four basic components of a computer system:

---

---

---

---

2. What component of a computer is considered the "brain" of a computer?

- |                              |                              |
|------------------------------|------------------------------|
| <input type="radio"/> output | <input type="radio"/> input  |
| <input type="radio"/> CPU    | <input type="radio"/> memory |

3. Select an item that would be used as output device on a computer system.

- |                               |                                |
|-------------------------------|--------------------------------|
| <input type="radio"/> monitor | <input type="radio"/> joystick |
| <input type="radio"/> mouse   | <input type="radio"/> keyboard |

4. Select an item that would be used as an input device on a computer system.

- |                                |                                |
|--------------------------------|--------------------------------|
| <input type="radio"/> monitor  | <input type="radio"/> printer  |
| <input type="radio"/> speakers | <input type="radio"/> keyboard |

Label the computer parts.
