

Fill in the missing number or operation AND write A, B, C, or E after each equation to show the property it matches.

Properties of Real Numbers

A

Additive identity property

the sum of any real number and zero is equal to the given real number

$5 + 0 = 5$, $13 + 0 = 13$

B

Multiplicative identity property

the product of any real number and one is equal to the given real number

$8 \cdot 1 = 8$, $15 \cdot 1 = 15$

C

Multiplicative inverse property

the product of a number and its multiplicative inverse (or reciprocal) always equals one

$4 \cdot \frac{1}{4} = 1$, $10 \cdot \frac{1}{10} = 1$

D

Multiplicative property of zero

the product of any real number and zero is zero.

$5 \cdot 0 = 0$, $99 \cdot 0 = 0$
