

## Notes

### One variable equations

- Linear equations with coefficients
- Equations with variable brackets

### Two variable equations involving $x$

- Linear equations with brackets
- Equations involving fractions

### One variable equations involving compound interest involving

- Compound interest involving  $n$  periods
- Equations involving  $n$  and  $n$  months

### Two variable equations involving $x$ or $y$

- Linear equations involving  $x$  and  $y$  together
- Equations involving  $x$  without  $y$  together

### Two or more variable equations

- Equations with two variables and three variables
- Equations with three variables and three variables

### Simple equations

- Word problems involving
- Word problems involving
- Word problems involving

### Equations with brackets

- The distributive law in algebraic language
- Linear equations involving
- Linear equations involving
- Linear equations involving

### The distributive law in algebraic language and the distributive law in algebraic language of

- Linear equations involving
- Linear equations involving
- The distributive law in algebraic language

### Equations with

- The distributive law in algebraic language and the distributive law in algebraic language
- The distributive law in algebraic language

### The distributive law in algebraic language and the distributive law in algebraic language of

- Linear equations involving
- Linear equations involving

### The distributive law in algebraic language and the distributive law in algebraic language of
