

Homework	Example	Mon.	Tues.	Wed.	Thurs.
Words read	10				
- Errors	- 2				
CWPM	38				

Let's read for 1 minute. My fluency skills get better each time I read the passage. I can read informational text and also remember what I read. **CCSS.1-2**
 Homework helper: The best way to read the passage is to have the child read for 1 min. Then, you read it to them. Later have them read it you more time.

Power Words

nest safe predator harm gather babies
 incubation hatch remain fly themselves

Birds are amazing creatures. Most birds can fly. Most birds build their nests in high safe spots. A bird wants to find a safe place for their home. They do this so they do not

get eaten by a predator. A bird will build its nest with whatever it can find. Some common materials you will find in a bird's nest are twigs, fabric, mud, and even paper.

A mother bird will lay her eggs in her nest. She will sit on the eggs to keep them warm. This is called incubation.

The babies inside the eggs need to stay warm so they can grow. Baby birds hatch out of their eggs when the time is right. The babies will remain with their mother until they can fly and find food for themselves. Then they will go out into the world and build their own nests.
