### Estimation Word Problems

Estimate the sum or difference by rounding each number to the nearest hundreds.

- 1) There are 4,162 walnut trees currently in the park. Park workers will plant 6,786 more walnut trees today. Estimate how many walnut trees will be in the park when the workers are finished. \_\_\_\_\_
- 2) Dan scored 6,776 points on the video game and Benny scored 2,372 points. Estimate how many points they scored together. \_\_\_\_\_
- 3) Alyssa has 6,526 Pokemon cards. Mike bought 4,156 of Alyssa's baseball cards. Estimate how many Pokemon cards Alyssa still owns. \_\_\_\_\_
- 4) Sally picked 4,566 limes and Dan picked 5,155 limes from the orchard. Estimate how many limes they picked together. \_\_\_\_\_
- 5) Mike had 7,644 quarters in his bank. He spent 2,257 of his quarters. Estimate how many quarters he now has in his bank. \_\_\_\_\_
- 6) Jason and Dan both collect marbles. Jason has collected 9,114 and Dan has collected 3,821 marbles. Estimate how many marble they own together. \_\_\_\_\_
- 7) Keith owns 1,699 books and Benny owns 3,835 books. Estimate how many books they have together. \_\_\_\_\_
- 8) The post office mails 9,618 letters each day, out of which 2,193 are addressed to foreign countries. Estimate the number of letters that are sent domestically. \_\_\_\_\_
- 9) Jessica is reading a book that contains 7,574 pages. She has read 1,433 pages. Estimate how many pages are unread. \_\_\_\_\_
- 10) Sally's school sold 6,517 boxes of doughnuts for a fundraiser this year. She sold 3,294 boxes. Estimate how many boxes were sold by the rest of the students. \_\_\_\_\_
