

Sounds from near and far

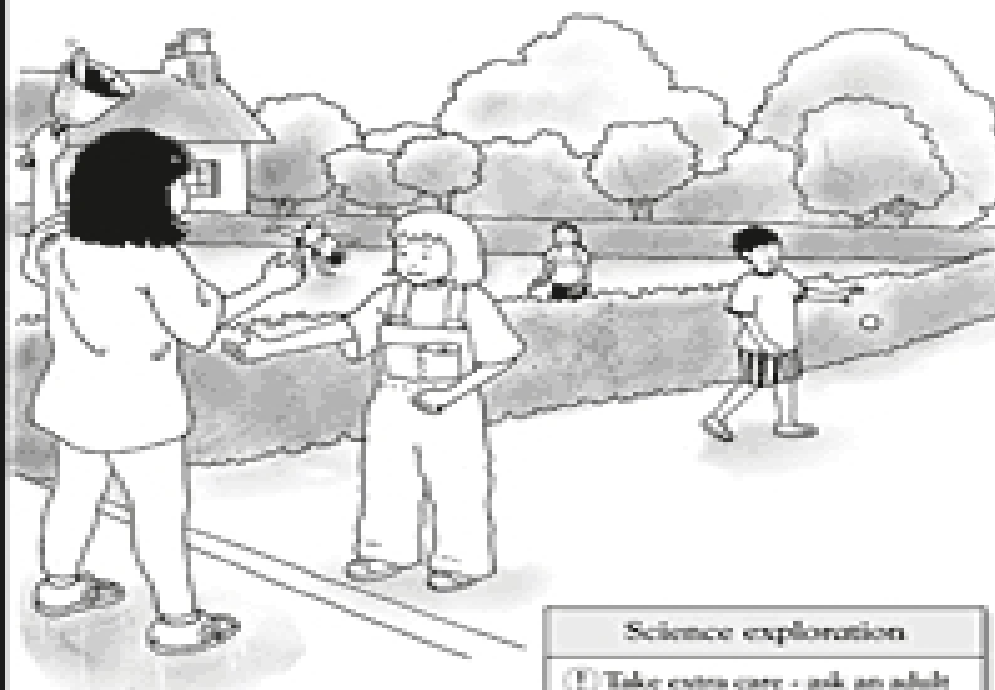

Observations

Some sounds are loud; some sounds are soft. The farther you are from a sound, the harder it is to hear.

Science activity

A girl is ringing a bell. Which of the other four children will hear the bell the loudest? Color in that child.

Science exploration

⚠️ **Take extra care - ask an adult to supervise you.**

Produce and use of a firecracker or poppers can create you in a room where you speak.
