

The Journal Editors' Study

The editors of the journal were given a questionnaire to complete. The questionnaire was designed to assess the journal's impact on the field of psychology and to identify areas for improvement. The questionnaire was distributed to all editors and was completed by 100% of them.

Statistical analysis of the data was conducted using SPSS software.

Results of the study are presented in the following table.

1. The journal is a high-quality publication.
2. The journal is well-read by the field.
3. The journal is well-cited by the field.
4. The journal is well-reviewed by the field.
5. The journal is well-accepted by the field.
6. The journal is well-respected by the field.
7. The journal is well-known by the field.
8. The journal is well-liked by the field.
9. The journal is well-used by the field.
10. The journal is well-valued by the field.

Conclusion:

The journal is a high-quality publication.
