

# SPRING

I like the springtime of the year. It starts to get warm, and we can go outside and play. Sometimes it rains, but that is alright with me.

When it rains, it helps the flowers grow. The flowers are pretty.

When the flowers grow, the butterflies come out. While we were outside, we saw ten butterflies!

My friends Kate and Ted helped me catch the butterflies. We used a net to catch them. We caught five butterflies.

We put the butterflies in a jar so we could look at them. At the end of the day, we took the butterflies outside and let them go. We had fun!
