

Irregular Shapes Worksheet

Directions: You must show what work for partitioning off each shape into the regular shapes. Then find the individual areas before adding them to solve the total area and perimeter.

Find the area:

1.  Area = $\square$ cm²
Per = $\square$ cm

2.  Area = $\square$ m²
Per = $\square$ m

3.  Area = $\square$ m²
Per = $\square$ m
