

(Sung to the tune of I Sing Myself)

Igneous rocks, igneous rocks
Form from lava, form from lava
Once it was melted, then it cooled and hardened
Igneous rocks, igneous rocks

Sedimentary, Sedimentary
The sediments settled, into many layers
Because of weathering, because of weathering

Metamorphic rocks, Metamorphic rocks
It forms from heat and pressure, it forms from heat and pressure
Below Earth's surface is where it gets squeezed
