

PUZZLED: the interval edition

Write the letter of the starting note on the line below it. Then follow the chain of intervals to find out what note you will land on at the end. Show your work along the way if you need to!

Example: $\uparrow 3^{\text{rd}}$ $\downarrow 2^{\text{nd}}$ $\downarrow 5^{\text{th}}$ $\uparrow 3^{\text{rd}}$ = F
start on: G (b a d f)

1) $\uparrow 5^{\text{th}}$ $\downarrow 3^{\text{rd}}$ $\downarrow 4^{\text{th}}$ $\uparrow 2^{\text{nd}}$ $\uparrow 4^{\text{th}}$ = ____
start on: _____

2) $\uparrow 3^{\text{rd}}$ $\uparrow 7^{\text{th}}$ $\downarrow 4^{\text{th}}$ $\uparrow 2^{\text{nd}}$ $\downarrow 3^{\text{rd}}$ = ____
start on: _____

3) $\uparrow 2^{\text{nd}}$ $\downarrow 7^{\text{th}}$ $\uparrow 3^{\text{rd}}$ $\uparrow 4^{\text{th}}$ $\downarrow 6^{\text{th}}$ = ____
start on: _____

4) $\uparrow 4^{\text{th}}$ $\downarrow 2^{\text{nd}}$ $\uparrow 5^{\text{th}}$ $\downarrow 3^{\text{rd}}$ $\downarrow 4^{\text{th}}$ = ____
start on: _____

5) $\downarrow 5^{\text{th}}$ $\uparrow 3^{\text{rd}}$ $\uparrow 4^{\text{th}}$ $\uparrow 2^{\text{nd}}$ $\downarrow 5^{\text{th}}$ = ____
start on: _____

6) $\uparrow 6^{\text{th}}$ $\downarrow 7^{\text{th}}$ $\uparrow 3^{\text{rd}}$ $\uparrow 7^{\text{th}}$ $\downarrow \text{octave}$ = ____
start on: _____
