**Drawing Conclusions about a text****Read the selections and answer the following questions.**

Many people all over the world drink coffee. Coffee has been around for over 700 years. It has been used in foods, wines, and medicine. It grows in several places in the world such as India, Africa, Mexico, South America, Central America, and the West Indies. There are over 100 types of coffee. A coffee is usually named for the area in which it is grown. Different areas of the world prefer different types of coffee. Caffeine, which is a stimulant, is found in coffee, and if it is taken out, the coffee is called decaffeinated.

1. You can conclude that

- ☐ a. If a coffee is called Brazilian coffee, it might be grown in Brazil.
- ☐ b. Everyone loves to drink coffee.
- ☐ c. South American coffee is the best.
- ☐ d. It is difficult to grow coffee beans.

2. You can conclude that

- ☐ a. You never can take all the caffeine out of a product.
- ☐ b. People should drink caffeinated coffee because it acts as stimulant.
- ☐ c. Coffee was first introduced in the West Indies.
- ☐ d. Coffee is usually grown in warm climates.

The Sahara desert is the largest desert in the world and takes up over three million square miles, which is almost the size of the United States. The Sahara desert is found in Africa. The Sahara isn't all just sand—it has almost 100 oases, or springs of water. Oil and gas can be found under this vast desert. There are other natural resources such as copper, iron, ore, and uranium. The desert doesn't get much rain. There aren't any paved roads, but cars can be driven with care on the desert floor. There are about two million people who live in the large desert.

3. You can conclude that

- ☐ a. It might be difficult to drive in the Sahara desert.
- ☐ b. All plants die since there isn't any water.
- ☐ c. People have used all the oil in the desert.
- ☐ d. People do not like to live in the desert.
