

Apple Fractions

Lesson 1

1. If you cut an apple into 2 parts of just the same size, what do you call one of the parts?

If you cut an apple into 2 parts so that one of the parts shall be larger than the other, will either of the parts be a half an apple?

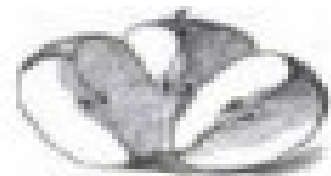

In the lower picture, is that part of the apple on the right more than half the apple, or less than half?

2. When you divide anything into halves, how many parts do you make of it?

How many halves in the whole of anything?

Which half of an orange is larger?

3. Into how many parts is this apple divided?

Are the parts of equal size?

What is one of the 3 equal parts of anything called? *Ans. One Third.*
