

QUESTION 1					
STATEMENT 1			STATEMENT 2		
STATEMENT	REASON 1	REASON 2	STATEMENT	REASON 1	REASON 2
10	100	1000	1000	10000	100000
If the number of apples is 100, then the number of oranges is 1000.			If the number of oranges is 10000, then the number of apples is 1000.		

10. STATEMENT 1: If the number of apples is 100, then the number of oranges is 1000. STATEMENT 2: If the number of oranges is 10000, then the number of apples is 1000.

QUESTION 2					
STATEMENT 1			STATEMENT 2		
STATEMENT	REASON 1	REASON 2	STATEMENT	REASON 1	REASON 2
10	100	1000	1000	10000	100000
If the number of apples is 100, then the number of oranges is 1000.			If the number of oranges is 10000, then the number of apples is 1000.		

10. STATEMENT 1: If the number of apples is 100, then the number of oranges is 1000.

- a. The number of oranges is 1000.
- b. The number of apples is 100.
- c. The number of oranges is 10000.
- d. The number of apples is 1000.

QUESTION 3					
STATEMENT 1			STATEMENT 2		
STATEMENT	REASON 1	REASON 2	STATEMENT	REASON 1	REASON 2
10	100	1000	1000	10000	100000
If the number of apples is 100, then the number of oranges is 1000.			If the number of oranges is 10000, then the number of apples is 1000.		

10. STATEMENT 1: If the number of apples is 100, then the number of oranges is 1000. STATEMENT 2: If the number of oranges is 10000, then the number of apples is 1000.

10. STATEMENT 1: If the number of apples is 100, then the number of oranges is 1000.

1. The number of oranges is 1000.
2. The number of apples is 100.
3. The number of oranges is 10000.
4. The number of apples is 1000.
