

I Saw an Astronaut!

Choose two different colors. Circle the *few* words with one color and the *four* words with the other!

My teacher said that it was time to draw.
At first I drew a tiger with a great big claw.
But that just didn't seem right.
I wanted to make something that was out of sight.
I had an idea and this is what I saw:
Something launched up into the air.
At first it gave me quite a scare.
But that vision, it caught my eye.
I really wanted to draw that guy.
It was the astronaut that I saw on T.V.
He really seemed cool to me.
I wanted to draw him in space.
It would be fun to have an alien chase.
I even dreamed of a trip to the moon.
This would all be real so soon.
So I remembered what I have been taught and let
my pencil do it all.
It was amazing and I was having a ball.
After my picture was done,
I wanted to do something else fun.
I decided to become an author and write a book,
About the astronaut who and the trip he took!
