

Class: _____ No.: _____ Name: _____

Scan the passages on the website and fill in the blanks with T (true) or F (false).

A.) What do you know about **Formosan black bears**?

Pre-reading	Questions	Post-reading
	1. Formosan black bears are also known as "white-throated bears" because of the V-shaped splotch (斑點) of white fur on their chest (胸口).	
	2. Formosan black bears usually move around singly; they like being alone.	
	3. If a person is attacked by a Formosan black bear, the best thing to do is to stay calm (保持鎮定).	
	4. Summer is black bears' mating season (交配季節).	
	5. The natural life span (生命長度) of Formosan black bears is about 60 years.	
	6. They can be found in forests throughout the island at elevations (海拔高度) of 1000-3500m.	

B.) What about **Taiwan Masu Salmon / Formosan landlocked salmon**?

Pre-reading	Questions	Post-reading
	7. Taiwan Masu Salmon feeds on aquatic insects (水生昆蟲) and their larvae (幼蟲).	
	8. They can only survive in clear, unpolluted waters with a temperature around 30 degrees Centigrade (攝氏).	
	9. Their breeding season is between March and April.
