

Boxed Number War Card Game:

For Use with Addition, Subtraction, Multiplication and Division Worksheets.

Choose Your Way to Play!

High Score: The player with the highest numerical answer wins 1 point! Whoever wins the most points in each row wins that round.

Low Score: The player with the lowest numerical answer wins 1 point! Whoever wins the most points in each row wins that round.

Sum More Fun: Play by solving all three problems in the row and then add the three answers together to get your score. The player with the highest row score wins.

Lucky Number 7: All problems get scored as above, however, if you get a "7" anywhere in the answer, you get 3 bonus points!

Black-Out: Play with more than two players! Continue to score each problem as above, however the winner is determined by the number of points accumulated throughout the entire page.
