

# Pictographs

One type of graph that gives us information is called a pictograph. In a pictograph, pictures are used instead of numbers.

Here is a pictograph that shows the number of fish caught each day at Canyon Lake.

- On what day were the most fish caught? \_\_\_\_\_  
How many fish were caught on this day? \_\_\_\_\_
- On what day were 40 fish caught? \_\_\_\_\_
- On what day were the fewest fish caught? \_\_\_\_\_
- Were the same number of fish caught on Monday and Thursday? \_\_\_\_\_  
How many? \_\_\_\_\_
- How many fish were caught on both Saturday and Sunday? \_\_\_\_\_  
(Add the two days together to get the total fish caught.)
