

Save our planet

There are many problems affecting our planet: environmental destruction, global warming, pollution, water pollution, air pollution, forest fires, etc. There are several ways to help improve the situation. Firstly, we should encourage recycling. Secondly, through our responsibility towards our local and global communities, joining an organization which fights to save our planet. Lastly, supporting groups such as Greenpeace, which is a global environmental movement, would save our planet and make it a better and safer place for future generations.

Air pollution

The deterioration of air pollution is a serious environmental issue. Such air pollution causes various health effects not only damage the air but also cause breathing problems among people who live in cities. We should take care from air pollution and encourage them to be part of activities which help in the environment.

Earth Day

It is very hard to imagine what the Earth will look like through a billion years. We should save the Earth for future. Earth Day is a celebration that occurred in our past. There is one major problem people are getting, that's recycling. It is a better part of our responsibility. Everyone can recycle. We can recycle paper, aluminum, plastic, ... In this way we can help making a better world for Earth Day.
