

Changing units of measurement

Fill in the missing gaps in the table. The first one has been done for you.

Measurement in small units	Measurement in large units
12 700 grams	12.7 kg kilograms
11 040 grams	kilograms
millilitres	2.004 litres
11 000 millilitres	litres
12 000 millilitres	litres
millilitres	24.000 litres
11 000 grams	kilograms
millimetres	4.004 metres
millimetres	7 metres
grams	50.122 kilograms

Sheep

Don't forget that 'kil' means 1000!

Does that measurement use 1000 values in a bigger value?
