

Changing units of measurement

Fill in the missing gaps in the table. The first one has been done for you.

| Measurement in small units | Measurement in large units |
|----------------------------|----------------------------|
| 12 700 grams | 12.7 kg kilograms |
| 11 040 grams | kilograms |
| millilitres | 2.004 litres |
| 11 000 millilitres | litres |
| 12 000 millilitres | litres |
| millilitres | 24.000 litres |
| 11 000 grams | kilograms |
| millimetres | 4.004 metres |
| millimetres | 7 metres |
| grams | 50.122 kilograms |

Sheep

Don't forget that 'kil' means 1000!

Does that measurement use 1000 values in a bigger value?
