

**Graphs**

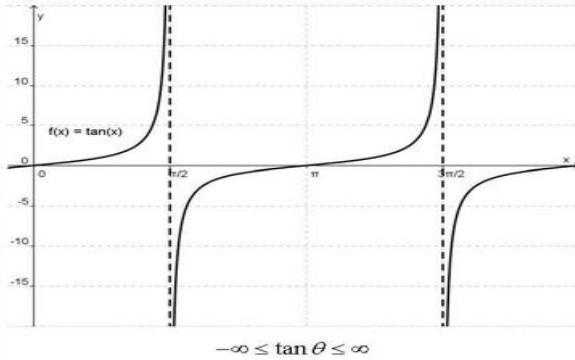

**(1) Sine**

**(2) Cosine**

**(3) Tangent**

**General Form:**

$$y = a \sin b(x \pm \theta) + c$$

$$y = a \cos b(x \pm \theta) + c$$

$$y = a \tan b(x \pm \theta) + c$$

Where  $a$  affects the amplitude,

$b$  affects the frequency (no. of cycles),

$c$  shifts the graph up or down,

$\theta$  shifts the graph left or right (phase shift).

For tangent graph, there are 2 asymptotes for  $0 \leq x \leq 2\pi$ .
