Fill in the blanks to create a GEO word list, and then search for the words.

Hint: You can find the answers in the exhibits. There is one dash for each letter in the word.

1) The Sun heats the Earth's oceans creating water vapor, which moves into the atmosphere to condense as clouds. These clouds will eventually precipitate as rain or snow. The precipitation falls over land and flows downhill back to the oceans. This is the dominant force in weathering the land. It is the _____.

2) All rocks exposed at the Earth's surface are slowly _____ away, producing small fragments.
